

Disaster LAN

Disaster LAN is the web-based solution to integrating and managing multiple functions of the State Emergency Operations Center. This training program will introduce users to the Disaster LAN environment from login to situation reporting, and accessing and using key functions and tools.

Who Should Attend: Personnel who may be assigned to the State Emergency Operations Center (State EOC) as an agency representative or support staff.

Prerequisites: None required. However, it is strongly suggested that all Disaster LAN users have knowledge of the Incident Command System (ICS). Introduction to ICS (I-100) can be taken online at <http://training.fema.gov/IS/>. Additionally, all agency representatives should have a thorough understanding of all expectations of their home agency when assigned to the State EOC.
